[Saunders Law Partnership LLP](#) have been invited to challenge the judgement of the General Medical Council's Interim Orders Panel (IOP) with a view to restoring Dr Sarah Myhill's prescribing rights and removing the conditions that have been imposed on her medical licence to practice.

Dr Myhill said: "The judgement of the IOP was based on no charges, no evidence and no case. The IOP response was irrational and not evidence based. The sanctions are completely out of proportion to the allegations made."

Dr Myhill's daughter on behalf of the family, Ruth Myhill, said: "We are setting up a Fighting Fund to legally contest the GMC." One Click Note: Watch this space.
