## One Click Announcement ME/CFS Wars

The One Click pressure group was born on 9 October 2003. Starting with our first core issue, biomedical Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS), WHO ICD-10 G93.3, we began to diversify to cover the following subjects by request as our readership grew hugely to cover over 100 countries around the world and many Opinion Formers resident therein. The subjects that The One Click Group covers today are:

- Biodefence and Biosecurity
- Pharmaceutical industry activities
- Government agencies such as the CDC, NICE UK etc.
- Government corruption
- Social Services and the Family Courts
- Data Protection
- Munchausen Syndrome by Proxy/Fabricated and Induced Illness (FII) et al
- Charities' malfeasance exposure
- Iatrogenic death
- Vaccine damage
- Medical research
- Health trials, including miscarriages of justice
- Prions and Prion diseases
- Controversial illness

See [One Click Bio](#).

In 2005, One Click was appointed as an official Stakeholder in the development of the most controversial CFS/ME NICE Guidelines and from that informed position, we developed our case for Judicial Review by overwhelming popular request.

Our evidenced account of how this case was handled in [How The Judicial Review Of The CFS/ME NICE Guidelines Was Lost](#) has caused those associated with the catastrophic failure of this action through legal misleading and misdealing, malice and spite to mendaciously foam on the internet.

Of all of the subjects that One Click covers, the ME/CFS illness and its corrupt charities in the UK contain the most poisonous political and medical vortex of all. Greater than vaccine damage, Munchausen Syndrome by Proxy/FII all rolled into one.

Although this aforementioned poisonous vortex is fascinating to ME/CFS watchers amongst the One Click readership, for most it has tragically become merely a vicious incidental sideshow. It is not the

illness itself which has become a vicious sideshow, far from it, but its politics. This is the ME/CFS wastepaper basket diagnosis that devastates the lives of 240,000 people in the UK alone, 40,000 of them children, some of them under five, living in darkened rooms and being tube fed and that deserve so much better.

Because of One Click's involvement as a Stakeholder in the development of the CFS/ME NICE Guidelines, we will continue to provide coverage of the aftermath of the Judicial Review. However, the UK ME/CFS politics carried out with malice and spite by the tiny elderly cabal that has tried to call the ME/CFS political and medical tune for years with such terrible results is not a pretty sight.

We suggest to our readers not dedicated to this subject that you swiftly move on to gen up on the other issues that One Click covers.

With best wishes
