Dear Sir/Madam

FOIA REQUEST

The One Click Health Advocacy pressure group is respectfully applying to the CDC for information under the United States Freedom of Information Act. The information in question relates to the recent epidemiological research study carried out by William Reeves of the CDC et al, published in the Population Health Metrics 2007, 5:5 doi:10.1186/1478-7954-5-5 and entitled 'Prevalence of chronic fatigue syndrome in metropolitan, urban, and rural Georgia'. (See attached). We require knowledge of the data used by William Reeves of the CDC et al to arrive at the conclusions put forward in this study to be placed in the public domain.

We request to be provided with all records related to the method used to calculate the results of this study and all of the data used in the calculations. In addition, we request provision of all of the correspondence concerning this study, including all E-mails. Problems that may have arisen in this study will have been discussed in correspondence.

We look forward to receiving this information no later than twenty business working days, as specified in the United States Department of Justice, FOIA Reference Guide, May 2006.

Many thanks for your co-operation.

Yours sincerely

The One Click Group
