

CFS/ME

Declaration of Interests

During its development the CFS/ME guideline development group complied with the Institute's policy on Declaration of Interests. Personal and non-personal pecuniary interests were reviewed and considered by the chairman. The guideline was nearing completion when the new policy came into effect. Following the policy revision, all GDG members have reviewed, and where appropriate amended, their declarations in light of the new policy.

When the request by NICE to place these on the website was received, the current declarations were sent to the GDG for a last review. Several GDG members have added or amended in the interests of transparency which may have been previously viewed as not relevant. Disclosure is based on the individual's assessment of the policy in consultation with the NCC-PC.

October 2007

Guideline Development Group - Declaration of Interests

Richard

Director, Clinical Governance Research Unit

Baker

Date last fully updated:

CURRENT INTERESTS
Personal specific

My wife and I have small shareholdings in GlaxoSmithKline which have not changed for 10+years. We would be happy to sell these shareholdings before work begins if they are seen as a conflict of Interest.

Personal non-specific

I am chief medical officer and a board member of Exeter Friendly Society. This Society offers private medical insurance, but does not provide health care. I am also chief medical officer of Liverpool Victoria friendly society, which again provides health insurance life insurance and income protection. It also does not provide health care. My remuneration structure for both organisations is the same: I am paid on an hourly basis for my advice. My payment is not linked in any way to my recommendations, or to the success or failure of the companies
