

DR. DICK VAN STEENIS MBBS-----CURRICULUM VITAE
Contact- 6 Oak View, Sarn, Newtown, Powys, SY16 4DQ Wales, U.K

Scotch College, South Australia. Secondary Schooling.	1948-1951
MBBS University of Adelaide Medical School. (3 scholarships)	1952-1958
Hospital RMO Teaching Hospitals Professorial units	1959-1960
Charitable service Third World	1961-1962
Postgraduate Courses UK including public health	1963
Hospital & GP locums NHS (UK & Norway).	1964-1965
Principal GP in UK NHS Glyn Neath, Chorley & Barnham	1966-1989
Part-time Clinical Assistant in Oncology OPD Chichester (4 years) & training.	
Vice Chairman Dispensing Doctors Association	1986-1990

I undertook research into health damage from UK industrial air pollution from Jan.1995 onwards. I visited Professor Dockery at Harvard School of Public Health several times in 1997 & 2001 and spoke to him and other consultant researchers in Denver, USEPA labs, and numerous others in USA, UK and elsewhere.

I lectured at 8 national & international medical conferences including AEHF Dallas 2002 & AAEM Virginia USA 2002 and attended others including the Royal Society, Microscopical Society, Public Health in London etc.

I have given evidence & lectured at Public Inquiries, many Council & local public meetings, usually winning. I was asked by the Canadian Dept. of Health to sort a power station health problem & they acted upon my advice.

I was asked to lecture on safer waste management by a state government in Jersey Sept. 2008 and have given advice to many individuals in other countries including Australia, South Africa, USA etc.

I am published in 4 peer-reviewed medical literature plus Toxic Times, The Whistle, Country Doctor, newspapers, radio, TV. My colleague Michael Ryan has mapped out ONS infant mortality at electoral ward level around 28 PM2.5 emitting incinerators etc. & examined low birth weight baby distribution also with stunning conclusions. Asthma incidence, SMR & other health data have also been mapped out proving health damage where expected. Michael & I have also written reports for UK government committees & councils. I now have 345 references backing my findings, which also include unwise vaccination programs.

I have attempted to sort the health effects of industrial PM2.5 emissions to air, explaining processes, cocktail effects, dietary protection, altered gene functions, vaccinations and other factors enabling me to propose constructive, affordable ways forward for public health including use of plasma gasification.

My interests include writing, travel, music, photography, charitable work and victim support. Compiled 16 February 2009.
